Keys and parts

1 Earpiece
2 Screen
3 End/Power key
4 Keypad
5 Microphone
6 Scroll key
7 Call key
8 Selection keys
9 Charger connector
10 Flashlight
11 Loudspeaker
12 Headset connector
**Insert the SIM card and battery**

1. Slide the back cover down.
2. Slide the SIM card under the metal part.
3. Make sure the plastic tab holds the SIM card in place.
4. Line up the battery contacts.
5. Push the battery in.
6. Slide the back cover up.
Charge the battery

1. Connect the charger to a wall outlet.
2. Connect the charger to the phone.
3. The phone indicates a full charge. You can use the phone while charging.

Switch on

1. Press and hold the power key.
2. To set the hour, press up or down. You can also press the number keys.
3. To set the minutes, press right, and then press up or down. Press OK.
The time is changed.

To set the date, press up or down. Press OK.

The phone is ready to use.

To avoid accidental pressing of keys, use the keypad lock.

Press Menu, and then quickly press *.

The keypad locks. To unlock the keypad, repeat step 1.
Explore your phone

1. To see the available functions, press Menu.

2. To go to a function, press the scroll key up, down, left, or right.

3. To select the function, press Select.

4. To return to the previous view, press Back.

5. To select an item, press Select.

6. To return to the home screen, press .
Make or answer a call

Make a call to a number that you have.

Enter the phone number.

A friend's phone rings. To answer, press.

You can enjoy chatting with your friend. To end the call, press.
Change the volume

Is the volume too loud during a call or when listening to the radio?

1. Press left for quieter, right for louder.
2. Better.

Use the loudspeaker

Others in the room can join in with a call.

During a call, press Loudsp.

1. During a call, press Loudsp.
2. Place the phone on a table.
**Use the headset**

You can make a hands-free call with a headset.

1. Connect a headset.
2. Make a call.

**Switch off**

To save battery power, switch the phone off.

1. Press and hold the power key.
2. The phone switches off.
Save a name and number

1. Add a friend's number to your phone.
   Write the name.

3. Select Add contact.

4. Enter the phone number. Press OK.

Cyan Magenta Yellow Black
Use Back

Go to a picture, and press Use.

When you receive a call, the name, number, and picture are shown.

Select Settings.

Press Menu. Select Contacts.

To use separate phonebooks, save contacts in the phone memory.

Save numbers in five separate phonebooks

Menu Go to Select Exit

Press Menu. Select Contacts.

Select Settings.

Save numbers in five separate phonebooks
To use the phone memory, select Memory in use > Phone.

Select Multi-Phonebook.

Select Multi-Phonebook.

Multi-Phonebook is ready to use.

Select Phonebook style.

Select Current phonebook.

Multi-Phonebook activated

Current phonebook

Shared contacts

Select Alternate phonebook.
Select a phonebook.

Select a contact.

The phonebook is set as the current phonebook.

Mark a phonebook, and press Done.

To add a contact, select Manage contacts.

Save the changes. To save more contacts, repeat steps 12–14.
Select Rename phonebooks and a phonebook.

Write the name, and press OK. The phonebook name is changed.

To see the phonebook quickly, press , and then press down.

Menu Go to Select Exit

Press Menu. Select Settings.

Select Tone settings.

Select Ringing tone.

Change the ringtone

Press Menu. Select Settings.

Select Tone settings.

Select Ringing tone.
To listen to the sound of a ringtone, go to the ringtone.

To use the flashlight, press up twice.

The ringtone is selected.

To switch the flashlight off, press up once.

Use the flashlight if you need more light. See (i) in General Information.
Send and receive messages

2. Select Create message.

3. Options Clear

   Hello Anna,
   To write your message, press the keys.

4. Press Options, and select Send. See i) in General Information.

5. OK Clear

   Phone number:
   0123456789
   Enter a phone number. Press OK.

6. The message is sent.

Cyan Magenta Yellow Black
Hello Anna, how are you today?
Set an alarm

Use your phone as an alarm clock to wake you up.

Press Menu. Select Clock.

Select Alarm time.

To set the hour, press up or down.

To set the minutes, press right and then up or down.

Press OK.
The alarm is ready.

An alarm sounds at the set time. Press Stop.

Set a reminder

Set a reminder to meet your friends.

Select Calendar.
Go to the date, and press Options.

To set an alarm, select Alarm on.

Select Add reminder.

To set the hour and minutes, press up or down.

Write a name for the reminder.

Press OK. The alarm is ready.
Listen to the radio

1. Use your phone to listen to the radio. See ii) in General Information.
2. Connect a headset. The headset cable works as the radio antenna.
4. To automatically find radio channels, press OK.
5. To select the next channel, press down.
6. To save the channel, press Options, and select Save channel.
Write a name for the channel, and press OK.

Select an empty channel. To save more channels, repeat steps 5–7.

Tip: Wake up to the radio. Press Options, and select Clock radio.

To use the loudspeaker, press Options, and select Loudspeaker.

To close the radio, press Options, and select Switch off.

Tip: Wake up to the radio. Press Options, and select Clock radio.
Use your phone to make a calculation.

To enter numbers, press the keys.

Press Menu. Select Extras.

To change a function, use the scroll key.

Select Calculator.

Enter the second number, and press Equals.
Read these simple guidelines. Not following them may be dangerous or illegal. For further information, read the complete user guide.

**SWITCH OFF IN RESTRICTED AREAS**
Switch the device off when mobile phone use is not allowed or when it may cause interference or danger, for example, in aircraft, in hospitals or near medical equipment, fuel, chemicals, or blasting areas. Obey all instructions in restricted areas.

**ROAD SAFETY COMES FIRST**
Obey all local laws. Always keep your hands free to operate the vehicle while driving. Your first consideration while driving should be road safety.

**INTERFERENCE**
All wireless devices may be susceptible to interference, which could affect performance.

**QUALIFIED SERVICE**
Only qualified personnel may install or repair this product.

**KEEP YOUR DEVICE DRY**
Your device is not water-resistant. Keep it dry.

**PROTECT YOUR HEARING**
Listen to a headset at a moderate level, and do not hold the device near your ear when the loudspeaker is in use.

**Battery removing**
Switch the device off and disconnect the charger before removing the battery.

**Product and safety information**
**Feature specific instructions**

**Important:** Do not use a mini-UICC SIM card, also known as a micro-SIM card, a micro-SIM card with an adapter, or a SIM card that has a mini-UICC cutout (see figure) in this device. A micro SIM card is smaller than the standard SIM card. This device does not support the use of micro-SIM cards and use of incompatible SIM cards may damage the card or the device, and may corrupt data stored on the card.

Your device may have internal and external antennas. Avoid touching the antenna area unnecessarily while the antenna is transmitting or receiving. Contact with antennas affects the communication quality and may cause a higher power level during operation and may reduce the battery life.
You can send text messages that are longer than the character limit for a single message. Longer messages are sent as two or more messages. Your service provider may charge accordingly.

Characters with accents, other marks, or some language options, take more space, and limit the number of characters that can be sent in a single message.

To listen to the radio, you need to attach a compatible headset to the device. The headset acts as an antenna.

Do not shine the flashlight in anyone's eyes.

Sending and receiving messages in some languages is a network service. For availability, contact your service provider. Send messages only to devices that support the selected language.

Network services and costs
Your device is approved for use on the EGSM 900 and 1800 MHz networks.

To use the device, you need a subscription with a service provider.

Using network services and downloading content to your device requires a network connection and may result in data traffic costs. Some product features require support from the network, and you may need to subscribe to them.

Take care of your device
Handle your device, battery, charger and accessories with care. The following suggestions help you protect your warranty coverage:
• Keep the device dry. Precipitation, humidity, and all types of liquids or moisture can contaminate electronics that corrode electronic circuits. If your device gets wet, remove the battery, and allow the device to dry.
• Do not store the device in cold temperatures.
• Do not attempt to open the device other than as instructed in the user guide.
• (Unauthorized modifications may damage the device and violate regulations governing radio devices.
• Do not drop, knock, or shake the device.
• Only use a soft, clean, dry cloth to clean the surface of the device.
• Switch off the device and remove the battery from time to time for optimum performance.
• Keep your device away from magnets or magnetic fields.
• To keep your important data safe, store it in at least two separate places, such as your device, memory card, or computer, or write down important information.

Recycle
Always return your used electronic products, batteries, and packaging materials to dedicated collection points. This way you help prevent uncontrolled waste disposal and promote the recycling of materials. Check how to recycle your Nokia products at www.nokia.com/recycling.
Crossed-out wheeled-bin symbol

The crossed-out wheeled-bin symbol on your product, battery, literature, or packaging reminds you that all electrical and electronic products, batteries, and accumulators must be taken to separate collection at the end of their working life. This requirement applies in the European Union. Do not dispose of these products as unsorted municipal waste. For more environmental information, see the product Eco profile at www.nokia.com/ecoprofile.

Batteries and chargers

Battery and charger information
Your device is intended for use with a BL-5CB rechargeable battery. Nokia may make additional battery models available for this device. Always use original Nokia batteries.

This device is intended for use when supplied with power from the following chargers: AC-3. The exact Nokia charger model number may vary depending on the plug type, identified by E, X, AR, U, A, C, K, or B.

The battery can be charged and discharged hundreds of times, but it will eventually wear out. When the talk and standby times are noticeably shorter than normal, replace the battery.

Battery safety
Always switch the device off and disconnect the charger before removing the battery. When you unplug a charger or an accessory, hold and pull the plug, not the cord.

When your charger is not in use, unplug it from the electrical plug and the device. Do not leave a fully charged battery connected to a charger, as overcharging may shorten the battery’s lifetime. If left unused, a fully charged battery will lose its charge over time.

Always keep the battery between 15°C and 25°C (59°F and 77°F). Extreme temperatures reduce the capacity and lifetime of the battery. A device with a hot or cold battery may not work temporarily.

Accidental short-circuiting can happen when a metallic object touches the metal strips on the battery, for example, if you carry a spare battery in your pocket. Short-circuiting may damage the battery or the connecting object.

Do not dispose of batteries in a fire as they may explode. Dispose of batteries according to local regulations. Recycle when possible. Do not dispose of as household waste.

Do not dismantle, cut, open, crush, bend, puncture, or shred cells or batteries. If a battery leaks, do not let battery liquid touch skin or eyes. If this happens, immediately flush the affected areas with water, or seek medical help.
Do not modify, remanufacture, attempt to insert foreign objects into the battery, or immerse or expose it to water or other liquids. Batteries may explode if damaged.

Use the battery and charger for their intended purposes only. Improper use, or use of unapproved batteries or incompatible chargers may present a risk of fire, explosion, or other hazard, and may invalidate any approval or warranty. If you believe the battery or charger is damaged, take it to a service centre for inspection before continuing to use it. Never use a damaged battery or charger. Only use the charger indoors.

Additional safety information
Make an emergency call

1. Ensure the device is switched on.
2. Check for adequate signal strength. You may also need to do the following:
   • Insert a SIM card.
   • Remove call restrictions you have activated for your device, such as call barring, fixed dialing, or closed user group.
   • Ensure your device is not in an offline or flight profile.
3. To clear the display, press the end key as many times as needed.
4. Enter the official emergency number for your present location. Emergency call numbers vary by location.
5. Press the call key.
6. Give the necessary information as accurately as possible. Do not end the call until given permission to do so.

Important: Activate both cellular and internet calls. If your device supports internet calls, the device may attempt to make emergency calls both through cellular networks and through your internet call service provider. Connections in all conditions cannot be guaranteed. Never rely solely on any wireless device for essential communications, like medical emergencies.

Small children
Your device and its accessories are not toys. They may contain small parts. Keep them out of the reach of small children.

Medical devices
Operation of radio transmitting equipment, including wireless phones, may interfere with the function of inadequately protected medical devices. Consult a physician or the manufacturer of the medical device to determine whether they are adequately shielded from external radio frequency energy.

Implanted medical devices
Manufacturers of medical devices recommend a minimum separation of 15.3 centimetres (6 inches) between a wireless device and an implanted medical device, such as a pacemaker or implanted cardioverter defibrillator, to avoid potential interference with the medical device. Persons who have such devices should:
• Always keep the wireless device more than 15.3 centimetres (6 inches) from the medical device.
• Do not carry the wireless device in a breast pocket.
• Hold the wireless device to the ear opposite the medical device.
• Turn the wireless device off if there is any reason to suspect that interference is taking place.
• Follow the manufacturer directions for the implanted medical device.

If you have any questions about using your wireless device with an implanted medical device, consult your healthcare provider.

Hearing

Warning: When you use the headset, your ability to hear outside sounds may be affected. Do not use the headset where it can endanger your safety.

Some wireless devices may interfere with some hearing aids.

Operating environment

This device meets radio frequency exposure guidelines in the normal use position at the ear or at least 1.5 centimeters (5/8 inch) away from the body. Any carry case, belt clip, or holder for body-worn operation should not contain metal and should position the device the above-stated distance from your body.

To send data files or messages requires a quality connection to the network. Data files or messages may be delayed until such a connection is available. Follow the separation distance instructions until the transmission is completed.

Vehicles

Radio signals may affect improperly installed or inadequately shielded electronic systems in motor vehicles such as electronic fuel injection, electronic antilock braking, electronic speed control, and air bag systems. For more information, check with the manufacturer of your vehicle or its equipment.

Only qualified personnel should install the device in a vehicle. Faulty installation or service may be dangerous and may invalidate your warranty. Check regularly that all wireless device equipment in your vehicle is mounted and operating properly. Do not store or carry flammable liquids, gases, or explosive materials in the same compartment as the device, its parts, or accessories. Remember that air bags inflate with great force. Do not place your device or accessories in the air bag deployment area.

Potentially explosive environments

Switch off your device in any area with a potentially explosive atmosphere, for example near gas pumps at service stations. Sparks in such areas could cause an explosion or fire resulting in bodily injury or death. Observe restrictions in fuel service stations, storage, and distribution areas; chemical plants, or where blasting operations are in progress. Areas with a potentially explosive atmosphere are often, but not always, clearly marked. They include areas where you would be advised to turn off your vehicle engine,
below deck on boats, chemical transfer or storage facilities and where the air contains chemicals or particles such as grain, dust, or metal powders. You should check with the manufacturers of vehicles using liquefied petroleum gas (such as propane or butane) to determine if this device can be safely used in their vicinity.

Certification information (SAR)
This mobile device meets guidelines for exposure to radio waves.

Your mobile device is a radio transmitter and receiver. It is designed not to exceed the limits for exposure to radio waves recommended by international guidelines. These guidelines were developed by the independent scientific organisation ICNIRP and include safety margins designed to assure the protection of all persons, regardless of age and health.

The exposure guidelines for mobile devices employ a unit of measurement known as the Specific Absorption Rate or SAR. The SAR limit stated in the ICNIRP guidelines is 2.0 watts/kg (W/kg) averaged over 10 grams of tissue. Tests for SAR are conducted using standard operating positions with the device transmitting at its highest certified power level in all tested frequency bands. The actual SAR level of an operating device can be below the maximum value because the device is designed to use only the power required to reach the network. That amount changes depending on a number of factors such as how close you are to a network base station.

The highest SAR value under the ICNIRP guidelines for use of the device at the ear is 1.28 W/kg.

Use of device accessories may result in different SAR values. SAR values may vary depending on national reporting and testing requirements and the network band. Additional SAR information may be provided under product information at www.nokia.com.

DECLARATION OF CONFORMITY

Nokia is transitioning between EU Notified Bodies and this product has been approved as complying with EU regulations with both Notified Bodies. Either of the CE marks shown may appear on the product during this transition period.

Hereby, NOKIA CORPORATION declares that this RH-130 product is in compliance with the essential requirements and other relevant provisions of Directive 1999/5/EC. A copy of the Declaration of Conformity can be found at www.nokia.com/global/declaration.
