Insert the (U)SIM card and battery

The USIM card is an enhanced version of the SIM card and is supported by UMTS mobile phones.

Keep all SIM cards out of the reach of small children.

Always switch the device off, and disconnect the charger before removing the battery.

1. With the back of the device facing you, press the release button **(1)**, slide the cover **(2)**, and lift it up **(3)**.

-
2. Slide the (U)SIM card into the holder **(4)**. Make sure that the bevelled corner on the card is facing the base of the device, and that the contact area on the card is facing the connectors on the device.

3. Insert the battery **(5)**.
4. Replace the back cover.

Headset and remote control unit

You can use the headset to handle calls and to listen to music on your Nokia N73 Music Edition device.

Insert the headset plug into the headset connector of the remote control unit. Insert the Pop-Port plug of the remote control unit into the Pop-Port connector on your device. The headset is now ready for use.

To make a call, enter the number on the device keypad as you do when the remote control unit is not connected to your device. During the call, speak into the microphone of the remote control unit. To answer and end phone calls, press .

To control the music player, use the media keys of the remote control unit. To adjust the earpiece volume, press the volume key on the side of the remote control unit. To lock the remote control keys, slide the lock switch on the side of the remote control unit.

Switch the device on

1. Press and hold the power key .
2. If the device asks for a (U)PIN code or lock code, enter it, and press . The factory setting for the lock code is 12345.

Your device has two internal antennas.

 **Note:** As with any other radio transmitting device, do not touch either of the antennas unnecessarily when the device is switched on. Contact with the antenna affects call quality and may cause the device to operate at a higher power level than otherwise needed. Not touching the antenna area during a phone call optimizes the antenna performance and the battery life.

When you switch on the device for the first time, it may prompt you to set the following information: **Select current city**, **Time**, and **Date**. Use the scroll key and the number keys. To find the city, enter the first letters of the city name. The city you select also defines the time zone for the clock in your device.

Your Nokia N73 Music Edition normally has MMS, GPRS, streaming, and mobile Internet settings automatically configured in the device, based upon your service provider or network operator information.

Press  to open the main menu.

Your service provider may have requested that certain features be disabled or not activated in your device. If so, they will not appear on your device menu. Your device may also have been specially configured. This configuration may include changes in menu names, menu order, and icons. Contact your service provider for more information.

Keypad lock (keyguard)

Use the keypad lock to prevent the keys from being accidentally pressed.

To lock: In the standby mode, press , then * . When the keys are locked,  is shown on the display.

To unlock: Press , then * .

When the keypad lock is on, calls may be possible to the official emergency number programmed into your device.

To turn on the display light when the keypad lock is on, press .

Insert the memory card

Use only miniSD cards approved by Nokia for use with this device. Nokia utilizes the approved industry standards for memory cards but not all other brands may function correctly or be fully compatible with this device.

Use only compatible miniSD cards with this device. Other memory cards, such as Reduced Size MultiMediaCards cards, do not fit in the MMC card slot and are not compatible with this device. Using an incompatible memory card may damage the memory card as well as the device, and data stored on the incompatible card may be corrupted.

You can use a compatible miniSD card as extra storage space to save the memory on your device. You can also back up information from your device to the memory card.

Keep all memory cards out of the reach of small children.

1. To insert the memory card (**1**), place your nail in the recess below the door of the memory card slot, and open the door.
-

2. Insert the memory card in the slot (**2**). Make sure that the contact area on the card is facing up and towards the slot.
-

3. Push the card in. You can hear a click when the card locks into place.
 4. Close the door. You cannot use the memory card if the door is open.
-

Eject the memory card

1. Before you eject the card, press , and select **Remove mem. card**. All applications are closed.
2. When **Remove memory card and press 'OK'** is displayed, open the door of the memory card slot.
3. Press the memory card to release it from the slot.

4. Remove the memory card. If the device is switched on, select **OK**.

 **Important:** Do not remove the memory card in the middle of an operation when the card is being accessed. Removing the card in the middle of an operation may damage the memory card as well as the device, and data stored on the card may be corrupted.

Transfer content from another device

To use the **Transfer** application, see the user guide.

Nokia Content Copier is available in Nokia PC Suite to copy content from a compatible Nokia phone. See the CD-ROM supplied with your device. Nokia Content Copier supports several Nokia phone models. For more information on the devices supported by each Nokia PC Suite, refer to the www.nokia.com/pcsuite pages.

Music player

Copyright protections may prevent some images, music (including ringing tones), and other content from being copied, modified, transferred or forwarded.

 **Warning:** Listen to music at a moderate level. Continuous exposure to high volume may damage your hearing. Do not hold the device near your ear when the loudspeaker is in use, because the volume may be extremely loud.

Play a song

1. Press .
2. Move the scroll key to navigate to a preferred song, artist or other category, and press the scroll key to open the category lists.
3. Press the scroll key to start playing the selected song. Use the scroll key to navigate the controls.

To open the **Now playing** view of the music player from any other view, press . To return to the previous view, press it again.

To select more music to play in the **Now playing** view, select **Options > Go to Music menu**.

To refresh the library after you have updated the song selection in your device, go to **Music menu**, and select **Options > Refresh Music library**.

The songs on the memory card are available only when the memory card is inserted.

Transfer music

1. Connect the data cable to a compatible PC and your device. Select **Media player** connection in your Nokia N73 Music Edition.
2. In a compatible version of Windows Media player, select the music transfer method from the following:
 - **Synchronise all**—The content of your PC music library and your Nokia N73 Music edition is automatically made identical by transferring music files in both directions. This happens every time you connect your device with a compatible version of

Windows Media Player. The playlists on your device are not synchronized with the PC. Your PC library may contain more files that can fit to the device memory and the memory card of your Nokia N73 Music Edition.

- **Synchronise selected**—Select manually what to transfer and where.

3. Enter a name that is used as the name of your device in Windows Media player.

To synchronise selected:

1. After your device is connected with Windows Media Player, select your device in the tree list of the right hand column or the music library in the left hand column.
2. Drag and drop the songs from the main column to the right column. To change the direction of the transfer, choose the source from the treelist on the left column.
3. To start the transfer, click the **Sync to PC / Sync** button at the bottom of the synchronization list. If you are transferring songs to your device, the progress bar below the device icon shows the available memory.

For more information, see 'Nokia N73 Music Edition' in the user guide.

Take pictures

Protection with F-Secure Mobile Security

 **Note:** This application is only available in a limited number of languages. F-Secure Mobile Security software for mobile terminals provides real-time, on-device protection against harmful content with automatic over-the-air antivirus updates. F-Secure Mobile Security is designed to scan all files you open in your device automatically for viruses, and to separate the infected files from the other files to protect them.

For instructions, see the Additional applications leaflet.

 **Important:** Your device can only support one anti-virus application. Having more than one application with anti-virus functionality could affect performance and operation or cause the device to stop functioning.

The third party applications provided with your device have been created and are owned by persons or entities that are not affiliated with or related to Nokia.
